

# M. Berkin Düz

Frontend Engineer | 4+ Years Enterprise E-commerce | Angular, Next.js, Vue.js

mberkinduz@gmail.com | +90 542 434 7384 | Izmir, Turkey | github.com/berkinduz | berkinduz.com | linkedin.com/in/berkinduz

## PROFESSIONAL SUMMARY

Frontend Engineer with 4+ years scaling enterprise e-commerce platforms serving millions of users across 10+ brands. Specialized in Angular (SAP Spartacus), Next.js, and Vue.js with proven track record of leading migrations, consistently optimizing performance and maintaining production stability. Strong expertise in headless commerce architectures, CMS integration (SAP SmartEdit, Storyblok), and automated testing. Mentored junior developers while delivering business-critical features in Agile teams across GCC and European markets.

## SKILLS

**Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS | **Frameworks:** Angular (4+ yrs), Next.js/React (2+ yrs), Vue.js, RxJS

**Architecture:** Headless Commerce, MACH, Component-based Design, Agile/Scrum | **Testing:** Selenium, Puppeteer, SolarWinds

**Platforms:** SAP Spartacus, CommerceTools, Vue Storefront v2, SAP SmartEdit, Storyblok | **Tools:** Git, GitLab CI/CD, Figma

## WORK EXPERIENCE

**Frontend Engineer, EPAM Systems** | Izmir, Turkey

February 2022 – Present

- Architected and maintained 10+ production e-commerce storefronts serving 2M+ monthly users across GCC markets, achieving 99.9% uptime through proactive monitoring and rapid incident response
- Led Angular to Next.js migration for multiple high-traffic brands, delivering post-launch stabilization and significantly improving page load performance
- Refactored core Angular modules during version upgrades, reducing bundle size and improving Time to Interactive metrics
- Built comprehensive automated test suite using Selenium and Puppeteer covering critical user journeys and reducing manual QA effort
- Owned production support for 10+ brands, diagnosing and resolving production-critical issues while maintaining clear stakeholder communication
- Delivered CMS-driven experiences using SAP SmartEdit for 20+ localized storefronts with multi-language support including RTL Arabic and English
- Collaborated within CI/CD pipelines using Git-based workflows (merge requests, code reviews, branching strategies) to ensure reliable deployments
- Contributed to headless commerce projects using Vue.js, working with API-driven architectures and CMS-integrated frontend components
- Mentored junior developers through code reviews and pair programming, establishing best practices and improving overall team code quality

**Junior Frontend Engineer, Emakina (Talent Academy Graduate)** | Izmir, Turkey

November 2021 – February 2022

- Selected for competitive Talent Academy Program following university graduation; completed intensive training covering software engineering fundamentals and frontend architecture
- Delivered 5+ production-ready features during training, earning full-time offer at EPAM Systems based on performance

## KEY PROJECTS

**Multi-Brand E-commerce Platform (Angular/Next.js) | September 2022 – Present**

Angular (SAP Spartacus), Next.js, TypeScript, SAP SmartEdit, GitLab CI/CD, Selenium, Puppeteer

- Built large-scale platform serving B2C customers across GCC markets with multi-language support including RTL Arabic storefronts
- Assisted in migration of multiple brands from Angular (SAP Spartacus) to Next.js, primarily supporting post-go-live stability and bug fixes, while significantly improving Core Web Vitals and page load performance
- Implemented monitoring with SolarWinds reducing downtime by 35% through proactive synthetic and real-user monitoring, performance baselines, and alerting system
- Maintained continuous communication with business, product, and client stakeholders ensuring clear prioritization, transparency, and timely resolution of customer-impacting incidents
- Worked extensively with SAP SmartEdit and Backoffice to deliver CMS-driven, localized, and dynamic content across regions

**Headless E-commerce Platform (Vue Storefront) | February 2022 – September 2022**

Vue.js, Vue Storefront v2, CommerceTools, Storyblok CMS, TypeScript, SCSS

- Developed multi-brand, multi-language headless e-commerce platform for European market with English and German language support
- Built reusable component library in Vue.js and integrated Storyblok CMS for content-driven page composition, empowering content teams to manage localized content independently
- Delivered incremental features through Agile/Scrum collaboration with cross-functional teams, focusing on performance optimization and improving Core Web Vitals and Lighthouse scores

## EDUCATION

**B.S. Computer Engineering**, Celal Bayar University | Graduated: June 2021

## LANGUAGES

**English:** Professional Working Proficiency (B2) | **Turkish:** Native
